Volume 29

NEWSLETTER OF THE IAQ

FOUNDED 1966

TACT

Preamble

From records it is noticed the last Contact Newsletter Volume-26 was published in December 2009. For some reason the Contact Newsletters Volume 27 for 2010 and Volume 28 for 2011 was not published in the last Triennial.

This Contact Newsletter will briefly cover the key events of 2010 and 2011 in the beginning. Thereafter it would cover the events of 2012 as was normally done in the past. It has been decided to term this Newsletter as Volume 29 as would have been the case in normal course.

1. What IAQ is

IAQ is an independent, self-supported, non-profit, non-governmental organization that is administered by a collegial assembly of individuals who have been elected by their peers from among the most respected, active and experienced protagonists of quality in the world.

1.1. The IAQ Way: Quality for Humanity

By our mutual contributions IAQ advances quality throughout the world for the benefit of humanity, pursuing excellence through professionalism based on uncompromising fundamental values of respect for individual,

integrity in thought and action and compassion for all living beings.

1.2. Purpose

By our mutual contributions IAQ advances quality throughout the world for the benefit of humanity.

1.2.1. Purpose Elaborated

By our mutual contributions We work collaboratively to achieve results, both as individuals and in actual or virtual teams.

IAQ advances quality

We seek to expand application of the philosophy, principles and methods of quality management, while developing new approaches to address the changing needs, particularly in the context of environment, conservation, healthcare and education.

Throughout the world

We will focus our priority on the fundamental social and economic needs of developing nations and ageing societies.

For the benefit of humanity

The benefit we seek is for humanity in terms of physical, emotional and intellectual well-being of people that could lead to peace and harmony with equity and justice for the greater good.

Congress
General Meeting

November 1, 2011 in Shanghai, China at SAQ Conference &
IAQ Forum
Informal Meeting

Advance understanding of quality through the following focus areas:

1. Promote Quality Worldwide – Broaden Outreach
 - Visibility and Impact on Policy Making - WIP
 - Public Awareness and Brand Image: External website developed and approved. Standard

Format for IAQ Business Cards, IAQ Letterhead; IAQ Power Point Presentation Template and IAQ Speech Template were completed

2. Engage Academicians in the Cause of Quality – Enhance IAQ Infrastructure

- Membership Growth [Acn. Molnar]: There has been good progress
- Meetings and Conferences [Acn. Aubrey]: While conferences with other organizations like ANQ, APQO and MEQA has improved ASQ WCQI did not provide any opportunity to have a joint panel discussion or session. EOQ Conference at Budapest provided good interface with IAQ.
- Formal meetings were held at ANQ, EOQ [Triennial], MEQA, and ASQ conferences and informal meetings were held at the APQO and SAQ conferences
- Publications and Information [Acn. Iizuka]: There has been little progress in this area.
- Organizational Efficiency [Acn. Keim]: Considerable work has been done in respect of revision of IAQ Bylaws and operation manuals. However it is still work in progress.

3. Influence Adoption of Quality in Practice – Following Think Tanks were initiated

Report of the Year 2012

Chair's message

The Importance of Purpose and Values

Acn. Sr. Mary Jean Ryan, Chair - IAQ

Before I address the title of this column, I wish to begin by saying what a privilege it is for me to be part of IAQ. No other Quality organization can boast of the number of prestigious members, who represent countries from around the Globe, and who represent such a breadth of industries all of whom have dramatically improved quality in so many ways. To be a colleague of such esteemed individuals is, indeed, an honor. Also, as you know, Chairman Greg Watson's many health problems prompted him to resign his Chair position shortly after the 2012 annual meeting in Anaheim. Greg contacted me and suggested that I assume the position of Chair until that term would be completed in 2014. Based on the achievements of Greg and all previous Chairs, to say that I was reluctant would be a gross understatement! However, Greg can be very persuasive, and with the approval of the Board, I agreed to serve as Chair to complete his term. This has been a truly gratifying experience, but without the gracious, and generous help of President Janak Mehta, I don't think that I could have said that. So, I wish to thank Janak publicly for all of the help that he has given me, and for serving IAQ so admirably.

Now to Purpose and Values: In midyear of 2011, there was a realization by many members that while there were many (way too many) wonderful things said about IAQ, there was no way to prove that we were faithful to what we said about ourselves. And what we said about ourselves was in a Purpose Statement, a Mission Statement, and a Vision Statement with much overlapping language among the

three. With all of that, it was clear that there was a major disconnect between our actions and our words. So, for instance, we said that one of the goals of the Vision Statement was: "To foster the use of quality philosophies, principles, techniques and tools for the resolution of global conflicts". But we had no way to demonstrate how we were doing that, or any of the other goals. In other words, wasn't this a matter of authenticity? When we looked at Values, there were many identified, but they were scattered throughout the By-Laws, and not clearly identified as Values.

Following discussion, two issues were decided:

- 1) that Purpose and Vision would be collapsed into a Purpose Statement of one sentence.
- 2) that one-word Values would be developed with a one-sentence descriptor for each.

To accomplish this task, a Team was formed which included Greg Watson, Janak Mehta, Noriaki Kano, Bob King, Hans Dieter Seghezzi, Lars Sorqvist, Tang Xiaofen, and myself. For a time, we tried to work through e-mail, but that proved ineffective. As it happened some members of the Team were planning to be in Russia for other meetings in March, so it was decided that we would meet face-to-face in St. Petersburg, on March 23rd, 2012. Spirited discussion by a fully engaged team of dedicated professionals produced a Statement of Purpose which says: "By our mutual contributions IAQ advances Quality throughout the world for the benefit of humanity". In like fashion we identified Core Values (with one sentence descriptors) for the IAQ, namely: Excellence; Professionalism; Respect; Integrity; and Compassion. While this is a huge step forward, we recognize that, in order to be authentic, we do need to identify measurement tools that will determine our fidelity to what we say about ourselves. Clearly, this is a task for the future.

To conclude my remarks, let me say again what a privilege it is for me to serve with all of you; your commitment to quality truly makes you a gift to the world.

President's message

Acn. Janak Mehta

On the conclusion of the first year of the current triennial it gives me great pleasure to wish all Academicians a happy New Year and thank everyone for their cooperation. I offer my apologies for the delay in publishing this Newsletter as we had to cover the key events of the years 2010 and 2011 also as the Newsletters in those years were not published.

Being relatively new to the Academy having joined in November 2008, I was pleasantly surprised to be elected as the Board Member in 2010 and then as the President in 2011. I accepted this responsibility as a privilege to serve the Academy and through it the quality professionals at large.

It took some time for the realization to sink in that I have been welcomed in the company of such eminent people from the field of quality management from around the world.

Last triennial 2009 to 2011 has been momentous in the Academy's history to reinvent and reinvigorate itself in the context of rapid changes in the global socio-economic environment. Thanks to the effort of the leadership a new direction was given. Some of the key highlights have been covered in the events summarized in the report for 2010 and 2011.

In continuation of that effort the unfinished agenda of the previous triennial is being pursued. While doing so and pursuing the goal of partnership with the United Nations we need to change the way we support organizational and societal requirements for quality of work.

Expectations of the society and the role of the professionals from the field of quality are changing rapidly. There is an

urgent need to adapt to these changes and then to lead such a change process in the community of quality professionals. This is being done by the various Think Tanks. Some of those on Governance, Education and Healthcare have made reasonable progress. Attempt has been made to involve professionals from respective fields who may not be members of the Academy to contribute in this effort. This will create a greater awareness in the society about the role being played by the Academy.

Academicians are encouraged to share their latest contribution through the Academy. If Academicians have developed a new approach, thought, idea or a new application in different fields please let us know. We could upload such contribution on the IAQ website whereby the Academician can share their ideas to professionals around the world providing opportunity to deploy the successful approach elsewhere.

Look forward to interacting with fellow Academicians during the year ahead.

In Memoriam

Dr. Genichi Taguchi
January 1, 1924 – June 2, 2012

Dr. Genichi Taguchi died in Tokyo on June 2, 2012 at the age of 88. He had risen from humble beginnings to become one of the most influential people in Quality Engineering. He has made pioneering contributions to Japanese and US industry. His Quality Engineering methods consist of both off-line and on-line quality control techniques. In particular, Taguchi's methods for robust parameter design have had a profound impact on the way experimental techniques are used to address the core needs of engineering [Read more]

**Report by Think Tanks**

- **Governance by Marcos Bertin**

QiGTT has done excellent work with the cooperation of the members. Awards for 2012 have been announced. Mr. Philips Armstrong was awarded the medal during the ANQ Congress. Medal to Mr. Masahiro Sakane Was presented at the opening plenary of ANQ Congress 2012 at Hong Kong.

The think tank should work to introduce the ideas of quality in corporate governance. One of the means for spreading the ideas will be a living document called the yellow pages for quality in governance. The yellow pages provide information on organizations and resources that work in the area of governance. Further

details can be read in the report submitted by the team. Names for the Governance award nominees for 2013 are being accepted till the end of September 2012. It should be a CEO who is known for his/her work on governance and a member of academia who has advanced the state of knowledge in this area.

- **Healthcare by Bob King**

The report lists the background of the healthcare crisis and the number one issue in health improvement opportunity which is the chronic illness self-care. The report what constitutes self care and the different statistics related to this issue. A discussion on root causes and on improvement opportunities is followed. The think tank activities include: creating appropriate guidelines and standards for pharmacist coaching and care, using quality function deployment QFD to gather and analyze the voice of the patient and family; the appropriate functions and measures as developed by the world's leaders in pharmacist care; improve patient safety processes for pharmacist care using AFD Advanced Failure Determination (TRIZ); producing the priority outcome and process measures for pharmacist care; participating in and helping develop national pilots for expanding pharmacist care, e.g. the CMS Innovation grant project \$10 million for 250,000 patients in western Pennsylvania over the next three years and the EU healthcare planning project and the European Society for Quality in Health care (ESQH) health futures group. Other work include working with India (through Janak Mehta) to help find the best ways to improve care of diabetics (India has 50% of the world's diabetics) and working with interested parties to update the standards creation processes for pharmacist care as well as setting up appropriate certification and accreditation processes. This is an ambitious think tank with several diverse components. The committee requests additional participation of academicians and their colleagues who are leaders in creating and implementing quality in health care or who want to contribute. Academician Molnar is going to help to solicit members to help in this area from Europe. Please contact Academicians Bob King and Pal Molnar.

- **Education by Roland Jahnke**

Academician Jahnke presented the activities of the think tank on Education. He has been actively involved in discussions with UNESCO for obtaining consultative status. He has personally attended many meetings of UNESCO. The Sustainability in Education Sector is an important agenda of UNESCO as millennium goal. From Bonn 2009 workshop there are activities done but there is no proper assessment methodology established. UN Decade of Education for Sustainable Development is being closely monitored; there was a gap of quality knowledge in this community. There is an opportunity for IAQ as an international body of quality lead experts.

QIETT session held on 3rd August 2012 in Hong Kong

Response from UNESCO has been positive. A meeting with UNESCO was happened on March 2012. Our application has been forwarded to their legal department. A Symposium on Quality in Education has been planned during the ANQ Congress scheduled in Hong Kong on August 3, 2012. Planning is to achieve an UNESCO consultative status by the end of the year 2012.
